

Ivan Zlatinov

Application Security Engineer

Application Security and DevSecOps-focused engineer with hands-on experience in .NET development, CI/CD automation, Docker, Terraform, and secure application design. Currently expanding expertise in secure coding practices, vulnerability management, OWASP Top 10, SAST/SCA tooling, and cloud-native security. Strong foundation in Linux systems, networking, and modern software development workflows with a growing focus on Application Security and DevSecOps in enterprise environments

WORK EXPERIENCE

HVAC Engineering Intern

Alkosclima Engineering

05/2025 - 09/2025

Achievements & Technical Experience

- Designed and deployed [HVACrate](#), an ASP.NET Core MVC web app that automated heating/cooling load calculations previously done manually in Excel, reducing manual calculation time by around 50%
- Managed the full application lifecycle - version control (Git), a basic CI pipeline and Docker containerisation
- Utilized AutoCAD to draft air-conditioning installation drawings and calculate energy efficiency metrics for HVAC projects

Frontend Engineer (UI/UX Design)

CustomCADs

11/2024 - 04/2025

Achievements & Technical Experience

- Refactored and deployed a 30-page web [CustomCADsDemoDesign](#) project, managing version control workflow and integration into live codebase via Git
- Collaborated with the stakeholder to translate technical requirements into implementation, practicing cross-team communication and problem solving
- Built a reusable React component library, reducing code duplication and improving maintainability across a 30-page platform

EDUCATION AND QUALIFICATIONS

Cybersecurity Engineering

Technical University of Sofia

09/2025 - Present

Enrolled via an Informatics international exam with a 100 (6.00) score

Google Cybersecurity Professional Certificate

Coursera, Online

05/2026 - Present

Currently completing practical training in Network Security, SIEM tools, Linux etc.

Software Engineer with C#

Software University, Online

04/2024 - 04/2026

Completed all of SoftUni's C# and DevOps Modules with an average grade 5.98 and acquired a diploma

TECHNICAL SKILLS

Application Security

OWASP, SAST, DAST, Secure SDLC

Cybersecurity

Network Security, Threat Detection
Linux, Bash/Shell scripting

DevOps & Cloud

Docker, Azure, CI/CD (GitHub Actions and Jenkins), Terraform, Prometheus

Networking

TCP/IP, DNS, DHCP, VLANs

Databases & Data Management

MS SQL Server, MySQL, PostgreSQL

Programming Languages & Web Technologies

C# (ASP.NET), Python, JavaScript
TypeScript React, HTML & CSS, Tailwind

PROJECTS

Macrolith (04/2026 - Present)

- Developed a backend .NET Web API following Clean Architecture and Domain-Driven Design principles
- Currently implementing secure authentication, role-based authorization, input validation, and controlled API access
- Managed secure external API integrations for AI-powered nutrition plan generation

HVACrate (06/2025 - 08/2025)

- Developed and deployed an ASP.NET Core MVC application automating HVAC load calculations
- Managed source control workflows with Git and implemented a CI pipeline for automated builds and deployments

Home Labs / Network Practice

- Practised VLAN configuration and routing in Cisco Packet Tracer as part of university coursework
