

Ivan Zlatinov

Full-Stack Developer (.NET + React)

Software Developer specializing in .NET and ASP.NET Core, with experience building secure web applications using modern architectural patterns. Experienced in implementing authentication, authorization, input validation, secure API design, and audit logging. Skilled in React + TypeScript for client-side development, with practical exposure to CI/CD pipelines, Docker, and cloud deployment. Passionate about developing maintainable, enterprise-grade solutions at the intersection of software development and security

WORK EXPERIENCE

HVAC Engineering Intern
Alkosclima Engineering

05/2025 - 09/2025

Achievements & Technical Experience

- Designed and deployed *HVACrate*, an ASP.NET Core MVC web app that automated heating/cooling load calculations previously done manually in Excel, reducing manual calculation time by around 50%
- Managed the full application lifecycle - version control (Git), a basic CI pipeline and Docker containerisation
- Utilized AutoCAD to draft air-conditioning installation drawings and calculate energy efficiency metrics for HVAC projects

Frontend Engineer (UI/UX Design)
CustomCADs

11/2024 - 04/2025

Achievements & Technical Experience

- Refactored and deployed a 30-page web CustomCADsDemoDesign project, managing version control workflow and integration into live codebase via Git
- Collaborated with the stakeholder to translate technical requirements into implementation, practicing cross-team communication and problem solving
- Built a reusable React + TypeScript component library, reducing code duplication and improving maintainability across a 30-page platform

PROJECTS

Macrolith (04/2026 - Present)

- Designed the architecture and developed a modular monolithic .NET Web API following Clean Architecture and Domain-Driven Design principles
- Integrating a third-party AI service to enable automated nutrition plan generation while ensuring secure data exchange and system reliability
- Designing and building a React + TypeScript client application, delivering seamless integration with backend APIs and external services
- Currently implementing secure authentication, role-based authorization, input validation, and controlled API access

Swift Message Parser API (06/2026 - 06/2026)

- Built an ASP.NET Core Web API that parses SWIFT MT103 financial messages, persists extracted data to SQLite using a custom repository/Unit of Work architecture, and provides full audit logging and API documentation

HVACrate (06/2025 - 08/2025)

- Developed and deployed an ASP.NET Core MVC application automating HVAC load calculations across buildings using EF Core and PostgreSQL for database management and Render for deployment
- Managed source control workflows with Git and implemented a CI/CD pipeline for automated builds and deployments using GitHub Actions

TECHNICAL SKILLS

Programming Languages & Web Technologies
C#, Python, SQL, JavaScript, TypeScript, HTML & CSS, JSON/XML

Frameworks & Libraries
.NET, ASP.NET, Entity Framework Core, React, Tailwind CSS, Bootstrap

Databases & Data Management
MS SQL Server, MySQL, PostgreSQL, SQLite, MariaDB, Excel

DevOps & Cloud
Docker, Azure, CI/CD (GitHub Actions and Jenkins), Terraform, Prometheus

Networking & Security
TCP/IP, OSI Model, DNS, HTTP, OWASP TOP 10, NIST CSF, Wireshark, tcpdump, XSS, CORS, JWT, bcrypt

EDUCATION AND QUALIFICATIONS

Software Engineer with C#
Software University, Online

04/2024 - 04/2026
Completed all of SoftUni's C# and DevOps modules with an average grade 5.98 and acquired a diploma

Cybersecurity Engineering
Technical University of Sofia

09/2025 - Present
Enrolled via an Informatics international exam with a perfect score of 6.00

Google Cybersecurity Professional Certificate
Coursera, Online

05/2026 - 06/2026
Completed practical training in Network Security, SIEM tools, Linux, intrusion detection, and incident response
